SUMMARY of QUALIFICATIONS

- Fourth-Year Information Technology student at York University with academic and practical experience in software development, systems analysis, databases, and web technologies
- Hands-on experience building front-end web applications using HTML, CSS, and JavaScript, with exposure to SDLC principles including planning, design, testing, and debugging
- Strong programming and analytical skills in Python, Java, and SQL, with experience developing data-driven applications using pandas, NumPy, and Jupyter Notebook
- Experience providing technical and administrative support in a fast-paced environment, including troubleshooting basic hardware/software issues and assisting with digital systems and workflows
- Strong understanding of networking, data management, and system fundamentals developed through coursework in data communications, systems architecture, and database systems
- Excellent communication and interpersonal skills developed through in-person instruction and user support roles, with ability to explain technical concepts clearly to non-technical users
- Experience managing multiple users simultaneously in instructional environments, demonstrating strong multitasking, organization, and problem-solving abilities
- Currently pursuing CompTIA Security+ and Network+ certifications with a strong interest in cyber security, IT infrastructure, and systems operations

EDUCATION

B.A., Hons. Information Technology

Toronto, ON

York University Class of 2027

EXTRACURRICULAR EXPERIENCE

York Maintenance App

- Developed the front end of a web application for submitting and tracking maintenance requests with user, staff, and administrator dashboards
- Designed responsive user interfaces and implemented navigation and workflows using HTML, CSS, and JavaScript
- Applied software development life cycle (SDLC) principles including planning, design, testing, debugging, and user-focused development

Loan Predictor

- Built a Python machine learning application to predict loan approval outcomes using pandas, NumPy, and Jupyter Notebook
- Cleaned, analyzed, and processed structured datasets to support predictive modeling and data-driven decision-making
- Tested, debugged, and refined the application while documenting development progress and results

WORK EXPERIENCE

Dr. Joseph Marques

Toronto, ON

Front Desk Help

Oct 2019 – Sept 2022

- Provided first-line technical support by assisting staff with basic hardware, software, and technology-related issues during day-to-day operations
- Supported digital record management, data entry, appointment scheduling, and electronic filing while maintaining confidentiality and data accuracy
- Guided staff through technology-related processes and workflow changes, helping ensure smooth day-to-day operations

City Of Toronto

Toronto, ON

Music Instructor

Jan 2026 – Present

- Delivered in-person group instruction to multiple students simultaneously with varying skill levels and learning speeds
- Explained complex concepts in a clear, structured manner while adapting communication for different learners in real time
- Managed classroom flow by troubleshooting individual learning challenges while maintaining overall group progress
- Built strong interpersonal and client-service skills through consistent interaction with students and parents
- Maintained lesson organization, scheduling, and progress tracking for multiple students concurrently
